

IESKANDAR ZULQARNAIN

SOFTWARE ENGINEER | FULL-STACK DEVELOPER

Shah Alam, Selangor • +60 14-916 1793 • ieskandarzulqarnain@gmail.com
linkedin.com/in/ieskandar-zulqarnain • github.com/Zieszx • zieszx.github.io/portfolio

PROFESSIONAL SUMMARY

Software Engineer with two years of professional experience delivering full-stack web applications, R&D software, and AI features. Works across enterprise stacks (Java/Spring Boot, PHP/Laravel, and the in-house SOAD framework) and modern JavaScript (React.js and Next.js/TypeScript). Has taken several systems from requirements through to deployment for government, e-commerce, audit, and network-marketing clients, and regularly integrates the OpenAI and other LLM APIs. A reliable team member who also runs internal AI training for colleagues.

TECHNICAL SKILLS

Languages: Java, PHP, JavaScript, TypeScript, Python, C++, Dart, SQL

Frameworks & Backend: Spring Boot (MVC), Laravel 10, Next.js, Django, Flask, SOAD Framework, RESTful APIs

Frontend: React.js, Next.js, HTML, CSS, Tailwind, Bootstrap, PrimeReact, Flutter, PWA

Databases: MySQL, PostgreSQL, Supabase, Firebase Firestore

AI / ML: OpenAI API, Anthropic Claude, FAISS vector similarity search, LLM integration, Vertex AI, Groq Cloud

Tools & Platforms: Git & GitHub, Visual Studio Code, Contabo VPS, Webmin, Socket.io, Drizzle ORM

Other: Teaching & training, problem-solving, teamwork, communication, debugging, testing

PROFESSIONAL EXPERIENCE

Webgeaz Sdn Bhd

Software Engineer

Apr 2026 – Present

Software Developer

Aug 2024 – Mar 2026

- Built a Personal Evaluation module that uses the OpenAI API, with carefully written prompts and timesheet data pulled from the Oczetra system, to help generate staff evaluations.
- Developed and designed Dashboard PIWN for Jabatan Wakaf, Zakat dan Haji (JAWHAR) to track ongoing Wakaf, Zakat, and Haji tasks, moving the team off manual filing and Excel onto a single centralised web application.
- Built AUDEZIA (audit management) and INXEPTA (e-commerce) client systems on the SOAD framework with MySQL — detailed under Key Projects.
- Added AI code prediction to the SOAD framework using LLM APIs from several providers, and built a reusable base template that made it quicker to start new projects.
- Built the Ezy Booking System (EzApp), where I learned and applied React.js alongside the SOAD framework, and added PWA support so the app works well on mobile.
- Run internal AI training sessions, helping colleagues use AI tools properly to get useful results; this has also strengthened my communication skills.

Freelance

Jan 2025 – Present

Part-Time Software Developer · Sole Developer

Nuvera (NuveraRose) · business.nuvera.com — MLM e-commerce platform · Laravel 10 / PHP

- Sole developer of a platform that helps members earn passive income selling beauty products, with a member base mostly in Africa.
- Built the member, genealogy, role/permission, auditing, reporting (Excel & PDF), and product-management modules. Live in production and under ongoing improvement.

Valorra (Meet Valorra) · meet.valorra.io — Dating app · Next.js, TypeScript, PostgreSQL

- Sole developer of a dating app with matching, swipe, profiles, and real-time chat.
- Built with Drizzle ORM, NextAuth, and Socket.io for live messaging; deployed on a Contabo VPS (v0.3, in active development).

Institute for Artificial Intelligence & Big Data (AIBIG, UMK)

Oct 2023 – Feb 2024

Full-Stack Developer (Internship)

- Built the AIBIG main website using Spring Boot MVC with a MySQL database.
- Built the AIBIG Research Assessment System (AIRAS) using Django and MySQL, working alongside AIBIG staff.
- Wrote RESTful APIs in Python and Java for internal use, and applied JavaScript plugins across both projects.

- Helped colleagues troubleshoot code, debug errors, and deploy projects, and produced 3D-printed souvenirs using SketchUp and Ultimaker Cura.

DreamEDGE

Aug 2022

Software Engineer (Internship — Industrial Training)

- Wrote software testing documentation for troubleshooting KAWBRA, an unmanned ground vehicle (UGV).
- Helped staff troubleshoot Arduino and Raspberry Pi wiring, fixed Arduino code, and assisted with rewiring the vehicle.

KEY PROJECTS

AUDEZIA — Audit Management System

SOAD Framework, MySQL, OpenAI API

- Built in a team of two: a web app that moves audits through their phases automatically once an application is made. Used the OpenAI API to suggest reporting, analysis, and summaries for each audit phase.

INXEPTA — E-Commerce System

SOAD Framework, MySQL, EasyParcel

- An e-commerce platform covering buying, selling, and shop management, with stock, product, voucher, user, and membership modules built to the client's needs, and EasyParcel integrated for shipping.

Dashboard PIWN (JAWHAR)

SOAD Framework, MySQL

- A central dashboard tracking Wakaf, Zakat, and Haji task progress, replacing manual filing and spreadsheets for JAWHAR staff.

Ezy Booking System (EzApp)

React.js, SOAD Framework, PWA

- A central booking platform that generates appointment slots automatically. Built with React.js (which I learned on this project) and set up as a PWA for mobile use.

AI Code Prediction System

Python, Flask, React, FAISS

- A code-completion tool using FAISS vector-similarity search with LLMs and support for multiple models, built into the SOAD development workflow.

EDUCATION

Universiti Teknologi Malaysia (UTM)

Oct 2020 – Oct 2024

B.Sc. Computer Science (Software Engineering), Honours

- CGPA 3.96. Relevant coursework: Data Structures & Algorithms, Databases, OOP, Software Engineering, Real-Time Software Engineering, Probability & Statistical Data Analysis.

Kelantan Matriculation College (KMkt)

Apr 2019 – Apr 2020

Science Stream Module — CGPA 3.96

Sekolah Menengah Kebangsaan Pahi

2017 – 2018

SPM (Science Stream) — 3A+ 4A 1A- 1C+

ACHIEVEMENTS & LEADERSHIP

- JPA PIDN Scholar (Sep 2021 – Aug 2024).
- Dean's List every semester throughout the B.Sc. Computer Science (Software Engineering) programme.
- Head of RESAK Run, Kolej Tun Dr. Ismail Open Day (OPERA'22) — planned and ran the Senam Robic and Fun Run activities and routes.
- Committee member, KTDI Sports & E-Games (SEGA'22) — helped organise the PUBG Mobile tournament.
